

RAJ KADU

rajkadu2700@gmail | +91 8261825587 | Khed, India

ABOUT ME

Aspiring Computer Science engineer specializing in Artificial Intelligence and Machine Learning, with a keen focus on Generative AI. Passionate about creating innovative and intelligent systems that blend creativity with technology. Experienced in Python, web development (HTML, CSS, JavaScript, React, MongoDB), and AI/ML model building. Actively deepening skills in Generative AI to pursue impactful projects and a future-driven career in the field.

WORK EXPERIENCE

- Gained hands-on experience developing responsive web applications using HTML, CSS, and React
- Collaborated with teams to create seamless and intuitive user interfaces.
- Used SQL databases and MongoDB for data storage.
- Contributed to AI/ML projects, including model development and Generative AI exploration.
- Demonstrated adaptability and a continuous learning mindset across frontend and AI/ML domains

KEY PROJECTS

Command Line Interface (CLI) Based Chatbot

Tech Stack: Python, Socket Programming, Multithreading

- Developed a Python-based CLI chat tool supporting real-time messaging across multiple chat rooms.
- Implemented socket programming and multithreading to handle multiple clients concurrently.
- Designed a scalable client-server architecture to ensure efficient, simultaneous communication.
- Focused on lightweight interaction with low latency for terminal-based chat operations.

CG Library Function (Custom Header File for Graphics Algorithms)

Tech Stack: C, Graphics Algorithms

- Designed a custom graphics library in C implementing core algorithms like DDA, Bresenham's Line, Midpoint Circle/Ellipse, Bezier Curve, and Clipping techniques.
- Focused on enhancing modularity and reusability of graphics code for academic and visualization purposes.
- Streamlined implementation of complex graphics routines for ease of integration in other C-based applications.
- Promoted better abstraction by encapsulating algorithms into a well-documented header file.

Project Review Platform (PRP)

Tech Stack: React, Tailwind CSS, Node.js, MongoDB, AWS S3

- Developed a web platform for managing academic projects with role-based access for Mentees, Mentors, HODs, and Coordinators.
- Enabled mentees to upload project files, mentors to review and give feedback, and coordinators to assign mentors and track progress.
- Integrated AWS S3 for secure file storage and ensured smooth interaction between frontend and backend services.

EDUCATION

Gharda Institute of Technology, Lavel

Bachelor of Engineering - Computer Science(AIML) Engineering; CGPA 8.97(upto semester 5)
2022 - 2026

Dnyandeep Vidya Sankul, Bhadgaon

12th; Percentage-78.00%
2021 - 2022

L.T.T English Medium School, Khed

10th; Percentage-89.00%
2019 - 2020

LINKS

Github://[RajMKadu](#)

LinkedIn://[RajMKadu](#)

SKILLS

LANGUAGES:C,Python,Java(Basic)

TOOLS & PLATFORMS:VS Code,Github,MySQL Workbench,MongoDB Compass,AWS Cloud

LIBRARIES & DATABASES: Pandas, NumPy, Matplotlib, Seaborn, SQL, MySQL,Scikit learn,OpenCV,TensorFlow, Keras

TECHNOLOGIES:HTML5, CSS3, JS , Excel, Machine Learning(ML),Deep Learning(DL),NLP

ADDITIONAL SKILLS:Logical Thinking, Problem Solving, Teamwork, Decision Making, Leadership Qualities,Communication

CERTIFICATIONS

- Data Visualization, Kaggle (April 2025)
- Introduction to Machine Learning, Kaggle (April 2025)
- Python Zero-to-Hero (Beginner Level), Udemy (April 2025)
- Python Zero-to-Hero (Intermediate Level), Udemy (April 2025)
- AWS Academy Graduate - AWS Academy Cloud Foundations (March 2025)
- Programming in Java, NPTEL (October 2023)
