Summary:

Motivated BE CSE (AIML) student with a strong foundation in AI, web computing, and data-driven applications. Experienced in building chatbot systems using Python, Flask, and Google Sheets. Skilled in generative AI and interested in monitoring systems and adaptive learning. Focused on practical problem-solving and user-centric design.

Top Skills

- **Programming Language:** C, Java and Python.
- **Framework & Libraries :** Flask, Django
- **Databases :** MongoDB, MySQL.
- **Tools:** Git hub, Twilio.

Projects

CG Header file: CG Header files Developed custom computer graphics library functions in C to create and manipulate 2D shapes. Implemented algorithms for line drawing, circle generation, and transformations like scaling, rotation, and translation. Enhanced understanding of computer graphics concepts and low-level programming.

WhatsApp Chatbot for Student Attendance Management: Developed a WhatsApp-based chatbot that enables students to conveniently access their attendance records. The chatbot uses OTP-based verification via registered phone numbers and stores class, branch, and roll number details for personalized future interactions. It integrates with Google Sheets to fetch both average and subject-wise attendance. Designed for ease of use, the chatbot streamlines student queries into a simple and responsive chat experience.

Pick-up Toolkit: Built a Django-based application to simulate technical interview scenarios and analyze student Performance using AI. The system records responses to subject-specific questions and uses computer vision techniques to capture facial expressions, eye gaze, and body posture. Based on the analysis, it generates an automated performance report with percentage-based insights and recommends improvement videos. Focused on backend logic, AI integration, and video/audio capture modules to deliver a functional prototype that supports body language and technical response evaluation.

Education

- **Bachelor of Computer Science (AIML) of Engineering (B.E.),** Graduation Year (2026), Gharda Institute of Technology, Ratnagiri. 8.64 CGPA (up to 5th semester)
- **H.S.C,** Maharashtra State Board of Secondary and Higher Secondary Education (2022), **82.00%.**
- **S.S.C,** Maharashtra State Board of Secondary and Higher Secondary Education (2020), **89.00%.**

Certification

- Java Programming (NPTEL)
- Python Basic (Hackerank)
- Gen AI for Code Generation in Python (Edureka on Coursera)
- AWS Academy Graduate (AWS Academy Cloud Foundations)

Extracurricular Activities

- Leadership Roles: Coordinator for Blood Donation Camp (NSS).
- Committee Roles: Event Organizer of BRAINS committees.
